Level: level1

About e-Definers Technologies

e-Definers Technologies is a modern EdTech and SaaS company based in GTB Nagar, Delhi. We specialize in delivering high-quality education and enterprise-level software solutions.

Our organization works in two major domains:

- EdTech – providing industry-focused training in AI & ML, Web Development, and Digital Marketing
- SaaS – offering digital transformation, AI integration, and scalable software solutions for businesses

Our mission is to bridge the gap between academic learning and real-world industry requirements using AI-driven platforms.

Faculty & Mentors

Harsh Khanna

Professor – Artificial Intelligence & Machine Learning

Rajeev Gaur

Professor – Digital Marketing

About AI Interview Platform

The AI Interview Platform by e-Definers Technologies is designed to simulate real interview environments for freshers.

The platform evaluates candidates based on:

- Communication skills
- Confidence
- Technical correctness
- Pronunciation and clarity

Using advanced AI models, the platform provides unbiased, structured feedback to help candidates improve their interview readiness and confidence.

Interview Questions & Answers

Q1: This interview is conducted by e-Definers Technologies.

Let's dive right into this! What are the basic differences between an array and a linked list in terms of memory management and data storage?

Answer: array is a linear data structure and linked list is a nonlinear data structure

Q2: This interview is conducted by e-Definers Technologies.

Your answer about the differences between an array and a linked list is partially correct, but could be more specific, can you tell me how the memory is allocated in both cases?

Answer: English

Q3: Vikas, thanks for correcting yourself about arrays and linked lists. Let's move on to something else.

What are the primary steps involved in creating a Basic Binary Search algorithm?

Answer: Skipped by candidate

Q4: This interview is conducted by e-Definers Technologies.

It seems like you skipped this question. Let's get started then.

Can you tell me what is the difference between 'String' and 'StringBuilder' in Java?

Answer: this interview is conducted by it defines Technologies

Q5: I'm glad we got that cleared up, Vikas. It's okay to start fresh.

You mentioned "String" and "StringBuilder" in Java, but I'm not sure if I got the context right. Can you clarify how a scenario would be different when choosing between these two?

Answer: so in a java string is a immutable and stringbuilder is a mutable in like you can

Q6: This interview is conducted by e-Definers Technologies.

Thank you, Vikas, for clarifying the difference between String and StringBuilder in Java. That's a great start!

When would you use a loop in Java to iterate over a data collection, as opposed to simply using a for-each loop?

Answer: Skipped by candidate

Evaluation Scores

grammar: 6
correctness: 4
pronunciation: 7
confidence: 8
overall: 6

Strengths

- good pronunciation
- showed willingness to correct answers

Weaknesses

- skipped questions
- basic understanding only

Final Result: FRESHER, LEVEL 1, NEEDS PRACTICE AND IMPROVEMENT
